API

An Introduction to the How and Why

Jennifer Johnson
Systems Librarian
jennifer.j.johnson10@gmail.com
What?

Application programming Interface is used to share data between two unrelated systems.
Advantages:

Retrieve data to complete an action without the user leaving your site

Text/data mining for other applications or analysis
REST:
Means that all information is contained within the request itself
Common HTTP Verbs Used:

GET → Request record
PUT → Update record
POST → Create record
DELETE → Delete record
Data:

JSON and XML
Languages:

Python
Javascript
Ruby
PHP
C#
Data Science

Collecting, querying, consuming and cleaning data extracted from a source or set of sources

Tool used for demo: Anaconda Python Distribution

https://www.anaconda.com/distribution/
Cheat Sheets

Anaconda: https://docs.continuum.io/_downloads/Anaconda_CheatSheet.pdf
